**ReadMe:**

You are an Intern at Riot Games as a cybersecurity head for League of Legends. The team is thinking of rehiring you next year, if you can correctly fix the errors their previous intern made. Complaints have come about unauthorized users and programs not authorized to be there.

The environment you are currently working with consists of the operating system:  
Ubuntu 16

It is company policy to use only Ubuntu on this computer. Management has decided that the default web browser for all users on this computer should be the latest stable version of Firefox, and it should be made available to all authorized users. Management has also advised you to make sure that the system is the most up to date it can be (without the inclusion of test builds).

**Critical Services:**

Firefox  
SSH
