

Practice Round Prep

What to do by this weekend

VMWare

Make sure you have VMWare ready and installed on your computer. To compete in CyberPatriot, you must be using VMWare, so no VirtualBox allowed!

Downloading Images

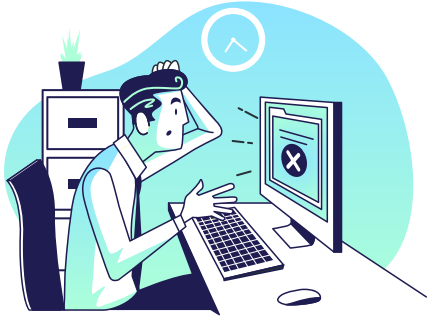

Download the Windows Images that you need for competition. I recommend downloading both, but if you want to save space, work with your teammates and discuss who is taking which image

Communication

Make sure that your partner is able to somehow see your screen. This can be through Zoom, Skype, Discord, etc.

If you are able to set up a remote connection with your partner, you can compete on the same image. But, remember: you are not allowed to have more than one of the same image.

DON'Ts

Save Images

Utilize the images provided to you and then delete them IMMEDIATELY after competition is over

Meet in Person

As of right now, COVID does not allow our school to meet in person, so you shouldn't either!

Call Other Teams

Calling other teams is against the rules and is listed as cheating. If you are caught cheating, you not only tarnish your name, but also our school's

Working Online

Together

You are allowed to remote desktop to work on your teammate's image

Crash

On the event that your teammate's computer crashes, you can extract on yours. However, this counts as a restart so delete the other image first.

• Parent Monitoring

Competition

During competition, parents are required to monitor you in order to verify you don't cheat!

TIPS

Work Together

The most important part of Cyber is teamwork! Work with your partner if you ever get stuck.

Experiment

Don't be afraid to try new things. Everyone is going to be struggling with the virtual format at first.

Do Your Best

Try to do as much as you can in the time limit. If you were stuck, you can always find out what went wrong by talking with an instructor
